Future Outlook

The economy is expected to grow at around 4.5% in 2017. The Future outlook on growth will depend on clarity in Government policy especially on taxes.

Declining economic growth in key export markets remain a concern. While the resumption of the GSP+ facility is positive the country will need to move fast to capitalize on the opportunities. Low crude oil prices would be beneficial for the economy. However international commodity prices remain volatile. Local weather conditions too will have a significant impact on the growth performance.

Interest rates are expected to increase or remain flat towards the end of the year depending on increased demand by the Government for the envisaged development projects.

The Fund being a Gilt Edge Fund is invested in a mix of Government securities of varied maturities. The Managers will continue to monitor the interest rate environment and make changes to the investment profile, to fulfill the Fund objective of providing liquidity and regular income for the investor.
