Future Outlook

With the GDP growth recorded in 2024 and 1Q2025 following the crisis-driven contractions in 2023 and 2022, the IMF anticipates Sri Lanka's real GDP to continue its recovery in 2025. This projection is underpinned by ongoing fiscal consolidation and the implementation of critical measures and reforms aimed at restoring macroeconomic stability, ensuring debt sustainability, safeguarding financial stability, and rebuilding external buffers despite prevailing economic vulnerabilities. The Central Bank of Sri Lanka (CBSL) projects a GDP growth rate of at least 5% YoY in year 2025.

In the midst of continued political stability, policy consistency, and the strengthening of macroeconomic fundamentals, it is essential for policymakers to remain vigilant and proactive. Enhancing the investment climate and improving state-owned enterprise (SOE) efficiency will be vital to meeting reform targets within the stipulated timeline under the IMF program. Achieving these milestones will help establish the permanent structural reforms necessary to build a sustainable, resilient, and robust economy. Moreover, it would mitigate risks stemming from macroeconomic vulnerabilities particularly fiscal slippage and the depletion of foreign reserves while paving the way for improved sovereign credit ratings and attracting significant foreign direct investments (FDIs) into the country.

However, the escalation of the Israel-Iran conflict and broader tensions in the Middle East could pose significant external risks. These geopolitical developments may negatively affect key sectors such as FDI inflows, tourism earnings, and workers' remittances. Additionally, heightened volatility in global crude oil and commodity prices could strain the country's balance of payments and exchange rate, leading to potential imbalances in key macroeconomic indicators. Such disruptions could also impact supply chains, contribute to rising inflation, and exert upward pressure on domestic interest rates.

The Fund being a Gilt-Edged Fund is invested in a mix of Government Securities within a one-year maturity period. The Managers will continue to monitor the interest rate environment and make changes to the investment profile, to fulfill the Fund objective of providing liquidity while maximizing returns for the investors.
